Re: Bylaw No. 1 – **Operating non-motorized and motorized vehicles**

Chief and Council would like to immediately implement the following by-law:

- **Children under 16 must wear a helmet while riding their bicycles.**
- **Individuals who operate off highway vehicles are required to wear a helmet.**

Community members are to exercise extreme caution when allowing their children to operate motorized and non-motorized vehicles.

Emergency services responded to an incident on July 3, 2018. A child lost control of an ATV which rolled over and had to seek medical attention.

Parents should never let children under the age of 16 drive or ride in an ATV, including models marketed as 'child-sized'.

Those aged 16 or older are encouraged to take the following advice:

- Wear proper protection gear, including a helmet, jacket, long pants, goggles, boots and gloves
- Ensure your ATV is properly equipped with a headlight and taillight
- Make sure others know where you will be in case of emergency
- Avoid drinking and drug use before or while operating an ATV

Chief and Council will be working with the Nishnawbe Aski Police Services (NAPS) to ensure individuals are wearing a helmet while operating off-highway vehicles and children are wearing their helmets and monitor for erratic/reckless driving patterns.

4.0 OVERVIEW

4.1 History

Several thousand years ago, the junction of the Saskatchewan and Pasquia Rivers in what is now Manitoba was the meeting place for early aboriginal peoples. In 1741, a fur-trading place was established and the Cree soon adopted the economics of trading furs. Later they served as middlemen for the surrounding First Nations wanting to trade their furs with the Hudson Bay Company. During the Hudson's Bay Company rule (1670-1870) interest in this land was restricted to its fur potential.

People settled in the northern regions of Manitoba localities that provided opportunities for hunting, trapping, fishing and other land uses. The strategic locations of The Pas and OCN on the Saskatchewan River enhanced its importance as a "Gateway to the North" during the days of the fur trade.

The Pasquia region has been known since 1691 when the Saskatchewan River was the main artery of travel during the fur trade era.

Some grain and garden crops were grown around the forts and church missions.

OCN's land base presently consists of 23,207.879 acres (9,392.1 ha.) within 18 various parcels of land, which are dispersed over a vast area of north-west Manitoba including land in Saskatchewan. OCN lands vary in sizes of land base ranging from 10 acres (4.047 ha.) to 8,699.57 acres (3,520.6 ha.)

An additional 55,045 acres (22,276 ha.) of land will be acquired through Treaty Land Entitlement (TLE).

The main OCN community is situated along the north bank of the Saskatchewan River at the confluence with the Carrot and Pasquia rivers directly across from the Town of The Pas.

Today, OCN is the home to over 5,000 people of Cree descent. It is one of seven (7) First Nation's within the Swampy Cree Tribal Council.

OCN is one of the most progressive First Nations in Canada and has a thriving culture, rich heritage and bright future.

OCN is a traditional gathering place of the Cree who meet to hunt, fish and socialize.

The community is recognized as a model for self-government and was the first (1st) First Nation Band in Canada to be recognized as a municipality.

4.2 Existing Land Uses

- (1) Most of the occupied and developed areas are within OCN 21E along the Saskatchewan River from the Townsite area to the community of Big Eddy.
- (2) OCN is fully serviced with sanitary sewer/water infrastructure and the roads of OCN are mostly asphalt paved with surface land drainage with the exception being the rural area.
- (3) OCN 21E is comprised of various sections:
 - a) the Townsite area is the hub of the community and has a mixture of land uses with:
 - i) the greatest concentration of land use activities consisting of residences and community facilities;
 - ii) land along the Provincial Trunk Highway (PTH) No. 10 within the Townsite area is primarily devoted to the commercial enterprises including a hotel, shopping centre, OCN Shell, Casino and Gordon Lathlin Memorial Centre which is home of the OCN Blizzard Junior A hockey team; and
 - iii) the banks of Saskatchewan River serves as a gathering place (ie. Opaskwayak Indian Days and Powwow's);
 - b) residences are also situated along Umpherville Road (known to community members as Eastside), there are few cemeteries and one commercial MTS tower;
 - c) residences are also situated along Kiche Maskanow Road (known to community members as Carrot River and Cow's Head) to the community of Big Eddy, there are few community facilities such as a church, cemetery, and parks;
 - d) the community of Big Eddy primarily accommodates single-family housing with community facilities such as a youth centre, water treatment plant, cemetery, Moose Park, the Big E Mart and the road leading to Pike Lake; and
 - e) further north of Big Eddy:
 - i) are the gravel and sand excavation areas;

4.3 Regional Development

- (1) The Pas region, also known as the “Gateway to the North”, is located approximately 375 miles (620 km) northwest of Winnipeg. The community is both a geographically and economically integrated region that is composed of three (3) distinct communities, namely, Opaskwayak Cree Nation (OCN), the Town of The Pas (The Pas), and the Rural Municipality of Kelsey (RM of Kelsey).

Opaskwayak Cree Nation, The Pas, and R.M. of Kelsey

- (2) Its unique location on rich soils of the Saskatchewan River Delta surrounded by dense boreal forests and countless fish stocked lakes endows the region with a colorful heritage and panoramic beauty.
- (3) OCN and The Pas serve as a major economic centre for many communities in northwest Manitoba. The businesses in the area provide goods and services to the large number of people in the neighboring communities. Businesses in OCN and The Pas also provide services and supplies to the local agricultural community. The RM of Kelsey has prime agricultural land.
- (4) The diverse regional economy includes strong forestry, agriculture, transportation and education sectors. In addition, with the agricultural section roughly 1.5 million bushels of grain and specialty crops are grown each year on up to 131,000 acres (53,051.7 ha.) of prime farmland within the Carrot River Valley area.

- (5) The area also has a thriving tourist industry due mainly to the forested woodlands of the Canadian Shield. The areas surrounding OCN and The Pas are home to beautiful lakes and rivers, with many scenic natural areas. The abundant forests of the area also support a strong forestry industry supplying local producers with raw timber.
- (6) OCN is one of the largest employers in the region with Tolko being the largest.
- (7) There is a local university within the region, located in The Pas. The University College of the North offers a broad range of post-secondary programs and opportunities to about 4,500 northern residents.
- (8) There are two (2) major festivals drawing hundreds of visitors to the area each year. The two events are:

The Northern Manitoba Trappers Festival, that features the World Championship Dog Sled Race, held in mid-February; and

The Opaskwayak Indian Days (OID), featuring the canoe classic, held in mid-August on OCN Lands. The site for the OID is where the Saskatchewan, Carrot and Pasquia Rivers meet and it is a traditional Cree meeting place where throughout history First Nations have converged to hunt, socialize and practice spiritual life.

4.4 Current Land Use Plan

- (1) The current OCN Land Use Plan is over thirty (30) years old and has not been updated since 1991. With numerous changes in land use, new additional lands and development, as well as, the approval of the *OCN Land Code*, the community has decided to enact this Land Law.
- (2) The existing OCN Land Use Plan provided development objectives for residential, commercial, industrial, community development, recreation, resources and green space. Community members have followed these objectives and implemented various recommendations outlined in the plan.

4.5 Existing OCN Parcels

OCN has 18 parcels of reserve land, totaling 23,208 acres (9,392.1 ha.) more or less, as listed below:

- (2) The Framework Agreement settled the land debt that was owed to the 19 First Nations under Treaties 1, 2, 3, 4, 5, 6 and 10 because they did not receive all the land they were entitled to.
- (3) OCN was entitled to an additional 56,068 acres (22,669.72 ha.) to be set aside as reserve land and which OCN has converted 8,699.60 acres (3,520.60 ha.) as of December 31, 2008. The Province of Manitoba was to provide 47,658 acres (19,287.19 ha.) of Crown Land. The Government of Canada was to provide \$2,153,051 to enable OCN to purchase up to 8,410 acres (3,403.53 ha.) of land where Crown Land was unavailable. This land purchase is to be made on a willing buyer/willing seller bases. In addition, Canada was to provide OCN with \$1,364,397 for the use and benefit of its members.

B. Policies

- (1) Low intensity uses such as some agriculture or green space recreational activities may be acceptable with hazard areas, but any other use involving higher intensity of development shall be restricted. Hazard areas include lands subject to flooding, water erosion, bank instability, landslides or subsidence. More specific criteria are as follows:
 - a) lands subject to flooding are all lands that would be flooded by a 100-year flood, or a flood specified by OCN or Provincial and Federal government agencies in area of protected flood control works;
 - b) lands subject to water erosion are all lands that would, within a 50-year period, be eroded or become unstable due to the action of water contained in an adjacent waterway or water body; and/or
 - c) land subject to other hazards such as landslides or subsidence are those lands where actual effects of such hazards have occurred or have been predicted by an accredited source such as a Provincial or Federal government agency.

- (2) It may not be practical or desirable for economic or social reasons to totally restrict development in all hazard areas. Developments shall, however, be carefully controlled to ensure that they are compatible with the risks or that the hazard has been eliminated or protected against. Where such exceptions are made, the following criteria shall be applied:
 - a) the development shall not adversely alter, obstruct or increase water flow, flood velocities or flood stages and should only be allowed if the cumulative effects of all foreseeable development in the flood prone area is within limits specified in the regulations or policies;
 - b) there shall be no added risk to life, health or safety;
 - c) all structures and services shall be protected against damage and shall be functional under hazard conditions;
