

**KAMLOOPS INDIAN BAND
WATER RATES AND REGULATIONS BYLAW NO. 2004-03**

**SCHEDULE "A"
WATER RATES AND REGULATION BYLAW TEXT**

1.0 DEFINITIONS

In this bylaw, unless the context otherwise requires:

Accessible means having access thereto but which first may require the removal of an access panel, door or similar obstruction.

Applicant means the registered customer of the property or an agent authorized by the customer to act on their behalf.

Authorized Agent means a person appointed to perform duties contained in this by-law by either the Band Council and/or the Director of Operations.

Band means the Kamloops Indian Band.

Band Land means reserve lands of the Kamloops Indian Band that are not held under Certificate of Possession.

Band Member means a registered member of the Kamloops Indian Band.

Band Water Service means the portion of pipe including all water stops between the Band main and the property line.

Certificate of Possession Holder or Locatee means a person entitled to the use and occupation of a parcel of reserve land duly allotted to him/her under Certificates of Possession or Notice of Entitlement.

Commercial means all buildings, non-Band Member business ventures, band member development corporations, and locatee lessors excluding Band Member residential.

Commercial Irrigation Use means the use of water by customers for growing agricultural crops, orchards or commercial gardens where items grown are either directly or indirectly for resale as food products.

Consumer means any person, company or corporation who is the owner, or agent for the owner, or any premises and who receives or uses water from the water system.

Council means the duly elected Chief and Council of the Kamloops Indian Band that is elected under the Kamloops Band of Indians “Custom” Election Regulations.

Curb Stop means a shut off installed by the Band on a service connection with a protective housing (service box) to the ground surface. The curb stop is located on the main side of the property line.

Customer means the legally registered and unregistered (buckshee) leaseholder or occupier of the property. This includes Head Leasee, Locatee, and Leasee.

Director of Operations means the administrator of Kamloops Indian Band.

Disconnection means the turning off, or complete removal of the water connection in the event of violation of this bylaw.

Distribution System means all mains and appurtenances thereto including fire hydrants, pumping stations, reservoirs, pressure reducing stations, meters and service connections installed within any highway, Band right-of-way or easement or on Band property.

Domestic Water Service means the system used to obtain, store and distribute water, which has passed through the Band’s water treatment plant used by customers within their building or premises.

Domestic Water means the use of water, which is passed through the Band’s water treatment plant by customers within their building or premises.

Head Leasee means a person that holds a lease on Band land that is sub-leased to one or more other persons.

Irrigation Use means untreated water used by customers for landscape irrigation, growing agricultural crops, orchards, commercial gardens for the sale of produce or sprinkling of Band or private recreational facilities.

Leasee means a person that sub-lease from a head leasee or leases or sub-leases from a Certificate of Possession holder.

Main means a pipe including valves, fittings, and other appurtenances other than a service connection, pumping station, treatment plant or reservoir in the water distribution system

Meter means a device used to measure and indicate the volume of water having passed through the device and shall include remote reading accessories

Payable means by money order, certified cheque, or cash.

Person means any individual, firm, company, association, society, corporation, group or municipality.

Planning and Engineering Department means the Planning and Engineering Department of the Band and any successor to this department from time to time.

Readily Accessible means direct access without the necessity of removing or moving away any panel, door or similar obstruction.

Residential means all single family dwellings, duplexes, semi-detached or row housing.

Service Connection means a pipe and the necessary valves and protective boxes, connections, thaw wires, and other material necessary to, and actually used, to connect the water main to a curb stop.

Special Reading means a meter reading, which occurs other than on the scheduled reading date at the request of the customer.

Water Service means a pipe including all valves, connections, taps and meters connecting a curb stop to a house or building and includes the tail nut of the curb stop.

Water Turn On/Off means the turning off or on of the curb stop valve supplying water.

Water Works means the entire water works system of the Kamloops Indian Band including the distribution systems, the intakes, and the water treatment plant.

2.0 ADMINISTRATION

2.1 Application

This Bylaw applies to the water supply and water supply system, all land, buildings and structures within the boundaries of the Kamloops Indian Band.

2.2 Severability

If any section, subsection, sentence, clause or phrase of this Bylaw is for any reason held to be invalid by the decision of any court of competent jurisdiction, the invalid portion shall be severed and the decision that it is invalid shall not affect the validity of the remainder.

2.3 Right of Entry

The customer of every parcel of land and premise shall at all reasonable times allow, suffer and permit the Planning and Engineering Department or other authorized representatives to enter into or upon lands and premises for the purpose of inspecting the premises and water piping system, meter location, meter connection and bypass facilities in order to ascertain whether or not provisions of this Bylaw are being obeyed.

2.4 Inspection

Water service pipes on private property shall have passed inspection by the Planning and Engineering Department prior to water being turned on to a water service line.

2.5 Violation

Every person who:

- .1 violates any of the provisions of this Bylaw;
 - .2 causes or permits any act or thing to be done in contravention or violation of any of the provisions of this Bylaw;
 - .3 neglects or omits to do anything required under this Bylaw;
 - .4 carries out, causes or permits to be carried out any development in a manner prohibited by or contrary to any of the provisions of this Bylaw;
 - .5 fails to comply with an order, direction or notice given under this Bylaw;
- or

- .6 prevents or obstructs, or attempts to prevent or obstruct, the authorized entry of an officer onto property under Section 2.3.

Commits an offence under this Bylaw.

2.6 Offence

Each day's continuance of an offence under Section 2.5 constitutes a new and distinct offence.

2.7 Penalty

Any person who commits an offence under this Bylaw shall be liable upon summary conviction to a penalty not exceeding one thousand dollars (\$1,000) or imprisonment for a term not exceeding thirty days or both.

3.0 USE OF WATER WORKS SYSTEM

3.1 Tampering with the Water Works System

No person shall make any connection or addition to the water works system, or in any way tamper, break, damage, destroy, uncover, deface with any fixtures connected to the water works system without obtaining permission from the Planning and Engineering Department.

3.2 Disconnection of Water Supply

The Planning and Engineering Department may order the disconnection of the water supply to any consumer upon provision of thirty (30) days written notice for the violation of any of the conditions of this Bylaw.

3.3 Sale of Water

It shall be unlawful for any consumer to sell, dispose of or give away Band water for use other than on their premise, unless on a metered account and is conducting a business from the premise approved by the Band. Application for permission to use water for the purpose of resale is found in Schedule "E".

3.4 Water Use Restrictions

In the event of a water supply shortage, the Band or Planning and Engineering, and the Water Treatment Plant Department(s) may issue a notice prohibiting, restricting or limiting the use of water.

No person shall use water supplied through the Band's domestic system to sprinkle or irrigate fields without first installing and maintaining proper backflow preventor and obtaining a permit to do so from the Planning and Engineering.

4.0 SERVICE CONNECTIONS

4.1 Installation of Curb Stops

All water service connections to the water works system shall be fitted with a curb stop.

4.2 Illegal Connections

No person shall connect or attempt to connect to the water works on any property or premises other than in accordance with the provisions of this Bylaw.

4.3 Connection Application

Each application for a water service connection shall be made to the Band in the form prescribed by Schedule "C". The applicant shall, on making the application, pay to the Band the applicable connection fee prescribed in Schedule "D".

Each application shall be an agreement whereby the consumer agrees to abide by the terms and conditions of this Bylaw.

If the connection is practicable, the Band shall at earliest convenience, weather permitting, install a water service connection to the applicant's property. If the connection is not practicable, the Planning and Engineering Department on behalf of the Band shall notify the applicant within sixty (60) days.

When water service is required for a new home on an unserviced lot, it shall be mandatory to make application for a water service connection and pay the fees or provide deposit at the same time as making application for a Building Permit.

For a new water service connection, other than residential the applicant will be directed to the K.I.B. Development Approval Process for requirements and approval.

The Band shall in every case determine the location and size of service pipe to be used, having first given due consideration to any specific requests.

Where a specific size of water service has been requested, and where the Band cannot readily supply such service, the applicant shall have the option to:

- (a) accept the size of water service as determined by the Planning and Engineering Department.
- (b) pay in advance the appropriate cost of upgrading the Band mains to meet the requested specifications, according to the Planning and Engineering

Department estimated costs, so long as the water supply capacity is available.

Fees for services larger than 100 mm and with special conditions require an estimate. After the installation the applicant will either receive a refund or be invoiced for the difference outstanding.

Any subsequent changes to the tenant(s), purpose, or use of water must be provided to the Planning & Engineering Department in writing by the customer at their earliest convenience.

4.4 Individual Connections

Each property shall have a water service connection and it shall be installed by the Band or under contract awarded by the Band. Each building shall have only one connection except when a separate connection is required for fire protection purposes or when a building expansion, use or zoning change makes the addition of a further connection necessary. Two buildings on the same lot are to be interconnected if possible.

Where the customer's request of water exceeds the Band's capacity to deliver water, then, the Band reserves the right to levy charges for water system upgrading in order to fulfil the customer's request.

4.5 Location of Water Service Connection

Where application for water service has been made in accordance with this by-law and it is found that no Band mains are within 20 metres (66 ft.) the applicant will be responsible to pay the Band actual costs, including administration fees, to bring the water service within 20 metres (66 ft.) of property line.

4.6 Size of a Residential Water Service Connection

The minimum inside diameter of a residential service connection shall be 20 mm.

4.7 Depth of Bury

The minimum depth of bury of the water service connection below finished ground elevation shall be one meter and eighty centimeters (1.8 m).

4.8 Maintenance of a Water Service Connection

In the event a defect is suspected in the service connection or water service, the consumer shall immediately notify the Band. If the defect is determined to be located in the service connection, the Band shall repair the defect at no cost to the

consumer. If the defect is determined to be in the water service, the customer shall effect the necessary repairs within five (5) days.

No person shall have any claim against the Band by reason of the cutting off of the water.

4.9 Existing Dual Connections

Where two buildings are presently served from an existing single water service connection, a second connection may be installed on application provided the Band receives the full amount for the second application as prescribed in Schedule "C" attached to and forming part of this Bylaw.

4.10 Service Connections Prior to Paving

Where street surface improvements by way of paving are scheduled for installation, the Planning and Engineering Department shall order a service connection to be installed to any property abutting such street and served by the water works system regardless of whether or not any improvement is constructed on the property and a connection fee as provided in Schedule "C" will be levied against the property and shall be recovered as provided for in Section 6 of this Bylaw.

5.0 WATER SERVICES

5.1 Connection Approval

Water services on private property shall be installed in accordance with the B.C. Plumbing Code at the expense of the customer, and shall be approved by the Planning and Engineering Department when connection to the water service is made. The Band shall install that portion of the water service connection between the curb stop and mainline; however, any fittings shall be the applicant's responsibility.

5.2 Maintenance

The customer at their sole expense shall maintain any water service on private property. In the event any defect is suspected, Section 4.8 applies.

In order to facilitate repairs to the water service, the Band will respond on demand or emergency call situations 24 hours a day, to open or close the curb stop for the fee set out in Schedule "D". The applicant is required to pay the fee in advance of a turn-on or turn-off during working hours. The customer will be billed the fee when a turn-on or turn-off is requested during off-hours.

5.3 Prevention of Contamination

All customers' must keep all pipes, stopcocks and other fixtures on their premises in good repair and order and protected from frost at their own expense.

Where it is found that damage has been caused by misuse or abuse to any part of the Band water service, or that service stops are not readily accessible and incur the band in costs, such costs shall be payable to the Band by the customer or person involved.

No customer or person shall connect, cause to be connected, or allow to remain connected, any piping, fixture, fitting, container or appliance, in a manner which, under any circumstances, may allow water, waste water, or any harmful liquid or substance to enter the Band's water system.

If a condition is found to exist which in the opinion of the Planning and Engineering and the Water Treatment Plant Departments is contrary to the aforesaid, the Planning and Engineering Department may either:

Upon reasonable notice to consumer, shut off water service, or without notice to consumer, shut off water service, where the Planning and Engineering Department in consultation with the Director of Operations has determined, that an immediate threat of contamination to the water system exists that may endanger public safety or health.

5.4 Access to Buildings

Any authorized agent of the Band to enforce this by-law shall have free access to all parts of every building in which water is delivered and consumed after reasonable notice has been given and request made. He may make personal inspection of all pipes, taps, and related fixtures used for distributing water, if defects are found, or if any wastage of water is found to exist, then a notice from the Planning and Engineering Department will be given to have the defect remedied at the expense of the customer within a reasonable time frame.

If any defect or defects of which notice is given not be remedied within the time limit specified, the Planning and Engineering Department in consultation with the Director of Operations, the Band shall have authority to cut off the supply of water from the main until such time that the said defect or defects are repaired.

5.5 Turn On and Turn Off

Only the Band shall have the authority to turn-on or turn-off the curb stop supplying water to any public or private system. When a customer wishes to turn-on or turn-off the water system at the curb stop, they shall make an application in writing to advise the Band using Schedule "G". A minimum forty-eight (48) hour's notice is required for non-emergency situations. The fee for any such turn-on or turn-off shall be provided in Schedule "D" attached to and forming part of this By-law.

The Band retains the right to adjust the water supply pressure or to interrupt supply due to emergency conditions or for the purpose of upgrading or carrying out general maintenance. Where it is practical and time permits, notice shall be given to all customers affected where alterations of pressure or interruption of service are to take place.

If a service line is found to be turned on and no record of the turn-on exists in the Band's files, it will be deemed appropriate to charge any rates retroactive to the time when the Band determines that the property was occupied.

5.6 Abandonment

When any water service is abandoned, the customer or their agent shall notify the Band. The Band shall abandon the service connection at the junction with the main. The customer shall be liable and subject to charge in Schedule "D".

5.7 Alternate Water Supply

In the event a customer has an alternate water supply or an irrigation connection, they shall not connect the alternate water supply or irrigation distribution system

to the distribution system supplied by the Band's domestic water service connection.

5.8 Fire Protection Connection

Water connections required solely to supply a fire protection system shall be installed upon application of the fees set out in Schedule "D" attached to and forming part of this Bylaw.

5.9 Disconnection

Application for disconnection of any water service shall be made in writing and delivered to the Band and until such application has been submitted, water rates shall be chargeable against the consumer until the water service is disconnected.

The Band, without notice, may disconnect the water service to any consumer for a number of reasons:

- (a) Unnecessary or wasteful use of water, or violation of regulations concerning watering and sprinkling;
- (b) Failure to maintain, repair or replace defective service and other pipes, fittings, valves, tanks, curb stop fixtures or appliances which are leaking or are otherwise not in a good state of repair and which are or may become a cause for wasting water;
- (c) Failure to protect the water service from frost;
- (d) Tampering with water meters;
- (e) Maintenance or repairs at any of the Water Work Facilities
- (f) Non-payment of water fees and/or charges as billed by the Band pursuant to this by-law.

6.0 METERS

6.1 Installation of Meters

All designated consumers shall make application and install a water meter and strainer, of a size compatible with the water service connection, in location easily accessible for inspection and reading of the meter. Where the service is to a single building, the meter may be located in the building as close as possible to the entrance point of the water service into the building.

6.2 Meter Size and Supply

The Planning and Engineering Department shall determine the size, location and method of installation of the meter required and the Band shall supply the manufacturer, make, units of measurement, and model of meter, remote reading equipment and strainer. All water meters shall become the property of the Band. The customer shall install the Band specified water meter and appurtenances at no cost to the Band. Inspection and approval of the installation is required by the Planning and Engineering Department.

6.3 Unacceptable or Absent Meters

Where an existing meter is determined by the Planning and Engineering Department to be unsuitable due to difficult access, potential bypass, or other valid reasons, they shall have the authority to require, within a time limit specified, the relocation, modification or replacement of the meter.

Where a customer receives water through an existing un-metered service, the Planning and Engineering Department shall have the authority to require, within a time limit specified, the installation of a water meter.

The required modifications or installation of a new meter, together with related valves and appurtenances shall be installed at no cost to the Band.

If the required modifications or installation of a new meter and appurtenances are not installed within the time specified, the Planning and Engineering Department in consultation with the Director of Operations may direct that they be undertaken by the Band or a contractor retained by the Band. The costs shall be added to and be due and payable with other charges as provided in Schedule "B" and "D".

No person shall have any claim against the Kamloops Indian Band by reason of the discontinuing of water supplied to his premises until the water meter is installed.

6.4 Tampering

No person shall tamper with, operate or remove the water meter or valves after installation.

6.5 Maintenance

The Band shall maintain and repair all water meters and remotes which are the property of the Band, but where replacements or repairs due to neglect or carelessness of the customer, any expense caused to the Band shall be charged to the customer. Meters will be tested by the Band upon request by the consumer. If the meter is found to be registering correctly the customer shall be billed the actual costs involved in removal, testing and reinstallation of the said meter.

If a water meter is out of order, it shall be lawful to charge an amount based on the amount of water used during the time the meter was in working order.

When a meter is out of order and fails to register the full amount of water supplied or indicates that no water has been used, it shall be lawful to charge and collect on the basis of the amount of water used during the time the meter was in working order or on the basis of any other information which can be obtained as to the amount used.

7.0 CHARGES FOR WATER SERVICES

7.1 Connection, Turn On or Turn Off and Abandonment Fees

The customer or his agent shall, on making application for a water service connection, a turn-on or turn-off, or the abandonment of an existing water service connection, shall pay to the Band the applicable stated in Schedule "D".

7.2 Fees Waived

Where water service connections of a size acceptable to the Planning and Engineering Department for the proposed use were provided to any parcel of land developed as an approved subdivision, the connection fee payable by the applicant of such parcel shall be waived.

7.3 User Rates

The customer shall pay in addition to all other fees, charges and rates for the use of the water works the amounts specified in Schedule "B". The several rates enumerated in Schedule "B" are imposed and levied by the Band, and all such rates shall be payable at the Band Administration Building quarterly on the first day of April, July, October and January in each and every year. The user rates as specified shall be applied on the day the water turn-on or turn-off is made. Payments are applied to the oldest balance first.

A charge of twelve per cent (12% simple interest rate) shall be added to the rates, rents and tolls set out in Schedule "B" inclusive of this by-law, if not paid within 30 days of the billing dates which are January 1, April 1, July 1, and October 1 of each year and further provided that the said charge of 12% shall be added to and be payable with respect to each instalment or portion thereof, in arrears, but shall not be compounded. Non-receipt of a utility billing will not exempt the customer from paying for the service he receives, or the payment of this penalty.

Any customer paying rent, rate or toll for the use of Band water shall be liable for same until he or she has given notice as outlined in Section 7.1 of this by-law to the Band of his or her desire to discontinue the use thereof. Any service supplied for a portion of a month shall be charged as if it were a full month.

The customer shall notify the Planning and Engineering Department in writing of any change in the use, occupancy, site serviced, or other matter which may affect the fees or charges payable under this By-law. Failure to provide the said notification will constitute a violation of this by-law.

Should any change entitle the customer to a reduction fee or charges or to a refund of fees or charges paid in advance, such reduction or refund shall take effect from the receipt of notice or from the actual date of change, whichever is later.

Should any changes entail an increase in the fees or charges, such increase shall take effect from the actual date of change as determined or estimated by the Band.

Customers depending on a continuous or uninterrupted supply of water or having processes or equipment that require particularly clear or pure water shall, after obtaining prior written approval, provide such emergency storage, oversize piping, pumps and tanks, filters, pressure regulators, check valves and additional service pipes, or other means for continuous and adequate supply of water suitable to their requirements at their own expense.

7.4 Fire Hydrants

No person shall in any way interfere with or tamper with any fire hydrant or part thereof. Unauthorized drawing of water from any fire hydrant or standpipe will be subject to Section 2.7 – Penalty.

7.5 Maintenance of Private Fire Hydrants

The customer at their sole expense shall maintain any replacements or repairs of fire hydrants required on private property. The customer shall provide evidence of such maintenance to the Planning and Engineering Department, upon request.

If the customer does not undertake the required hydrant maintenance, the Band may carry out routine maintenance of fire hydrants located on private property for a fee set out in Schedule “D”. This maintenance shall be in accordance with the B.C. Fire Code.

7.6 Irrigation Use

A domestic water connection may not be permitted for the purpose of irrigating landscaped areas only.

The objective of the Band is to utilize irrigation water from one of the Band’s designated irrigation supply system for irrigation, wherever practical.

7.7 Special Meter Reading Charge

In the event a customer requests the Band to conduct an additional meter reading, which occurs other than on the scheduled reading date, the customer is required to pay an additional \$25.00 to the Band

8.0 SERVICE CALLS

When a customer has called upon the Band to respond and evaluate a problem on private property, the occupant shall be responsible for all costs incurred by the Band if the water problem is not a result of the Band water system.

9.0 EFFECTIVE DATE

This Bylaw shall come into force and take effect upon the date of registration.

ADOPTED THIS 25th DAY OF May, 2004

**KAMLOOPS INDIAN BAND
WATER RATES AND REGULATIONS BYLAW NO. 2004-03**

**SCHEDULE "B"
DOMESTIC WATER SYSTEM USAGE RATES**

Description	<u>BASE RATE</u>	Annual Charge
For each property with a 20mm or smaller service		165.48
For each property with a 26mm service		330.96
For each property with a 32mm service		579.18
For each property with a 38mm service		827.40
For each property with a 51mm service		1,985.76
For each property with a 64mm service		3,309.60
For each property with a 76mm service		4,137.00
For each property with a 102mm service		7,446.60
For each property with a 152mm service		14,065.80
For each property with a 200mm service		16,548.00
For each property with a 250mm service		25,856.25
For each property with a 300mm service		37,233.00
- The Base Rate is charged for each property using the water service.		
- The Base Rate is in addition to any other charges, i.e. Domestic Water System Usage Rates - Minimum Users Rate and/or Domestic Water Metered Rate.		
- If a property is served by more than one water service, multiples or combinations of Base Rate may apply.		

**KAMLOOPS INDIAN BAND
WATER RATES AND REGULATIONS BYLAW NO. 2004-03**

**SCHEDULE "B"
DOMESTIC WATER SYSTEM USAGE RATES**

MINIMUM USERS RATE

Description	Annual Charge	Quarterly Charge
Each family unit	148.80	37.20
Each rentable room in boarding house	54.40	13.60
Commercial: Light use 16 - 20mm	272.00	68.00
Commercial: Medium use 25 - 38mm	816.40	204.10
Commercial - Heavy use 50 - 300mm	1,633.20	408.30
Each car wash bay	1,360.80	340.20
Each 100 sq. M. office space	57.20	14.30
Each rentable Hotel or Motel room	143.20	35.80
Each service station bay	164.40	41.10
Each seat in restaurant, bar, pub, etc.	21.20	5.30
Each church or hall	143.20	35.80
Each 100 Sq. M. of banquet hall	272.00	68.00
Each student in school, college, etc.	28.40	7.10
Each bed in hospital or care units	343.60	85.90

- Where two or more uses are made of a single property or building, multiples or combinations of the user rates will apply.
- The actual quarterly domestic water billing is the Domestic Water System Usage Rates - Base Rate plus the greater of the Domestic Water Usage Rates - Minimum Users Rate and the actual Domestic Water Metered Rate.

KAMLOOPS INDIAN BAND

WATER RATES AND REGULATION BYLAW NO. 2004-03

SCHEDULE "D"

WATER SERVICE CONNECTION FEES

This is Schedule "D" entitled "Water Service Connection Fees", which forms a part of the Kamloops Indian Band's Water Rates And Regulation Bylaw No.2004-03.

1. CONNECTION FEES FOR A NEW WATER SERVICE INSTALLATION

Pursuant to Section 4 of this Bylaw, the connection fees for a new water service connection shall be as follows:

(a)

Table of Connection Fees	
Connection Size	Connection Fee
20 mm	\$ 1,650.00
25 mm	\$ 1,960.00
38 mm	\$ 2,265.00
50 mm	\$ 2,575.00
100 mm	ESTIMATE

(b) The connection fees in (a) above do not include the following:

1. Service connections exceeding 20 metres in length.
2. Service connections which require the augering and/or the restoration of curbs, sidewalks or asphaltic pavement surface.
3. Service connections which require the cutting, excavation or backfilling of frozen ground.

- (c) Any type or size of water service connection not listed in Schedule "D" or to which clause (b) applies and installed by the Band, shall be charged to the applicant at a fee equal to the actual costs of the installation, plus any applicable taxes. The minimum fee shall be One Thousand Four Hundred Fifty (\$1,450.00) Dollars.

2. TURN OFF AND TURN ON

- (a) Pursuant to Section 5.2 of this Bylaw, the fee for turning on or turning off an existing water service connection, on demand or after hours only on an emergency basis, shall be Two Hundred (\$200.00) Dollars for each turn on or turn off.
- (b) Pursuant to Section 5.5 of this Bylaw, the fee for turning on or turning off an existing water service connection during regular working hours shall be Fifty (\$50.00) Dollars for each turn on or turn off.
- (c) An application and payment of the fee is required in advance, with the exception of the on demand or emergency call out situations.

3. ABANDONMENT FEE

Pursuant to Section 5.6 of this Bylaw, the fee for disconnecting an abandoned water service connection at the water main shall be a fee equal to the actual cost for disconnection plus any applicable taxes. Payment is required in advance with a refund or invoice of difference in actual cost.

4. FIRE HYDRANT MAINTENANCE

Pursuant to Section 7.5 of this Bylaw, the annual fee for "routine" maintenance of private fire hydrants shall be Two Hundred (\$200.00) Dollars for each fire hydrant.

5. SPECIAL METER CHARGE

Pursuant to Section 7.7 of this Bylaw, where a customer requests a special meter reading, a fee of \$25.00 payable to the Band for each meter will be charged in addition to the normal water and meter charges for the special reading period.
